What is an LER?

An LER is a Learning & Employment Record. It is a digital record of one's formal and informal learning and employment history. LERs provide all individuals with a chance to communicate skills - whether you're a student figuring out next steps or a jobseeker looking to shift careers.

Everyone's Got Skills That Tell a Story.

Your learning and employment journey is unique, and it matters. With LER.me, you can tell your story and lead with skills and credentials that are earned and most relevant in the talent marketplace. LER.me provides those who have a non-traditional educational background with an opportunity to be placed in entry-level roles that have typically been out of reach due to degree requirements.
